

BIOLOGY 6C FIELD PROJECT — PRELIMINARY PROPOSAL

(Note: this is a *preliminary* proposal. That means it is subject to considerable modification. Don't worry about getting it exactly the way it will work out. Save the obsession over details for the final report. However — expressing yourself clearly and eloquently *is* still important.)

1. Name the *three or four* members of your project group:

• NAME: _____ PHONE: _____ EMAIL: _____

2. Working title of your project:

3. What are the primary objectives of this study?

[I.e., what do you intend to survey/compare/study? What are the goals of the project?]

4. State your working hypothesis.

5. Study sites: [park, reserve, property, etc.]

6. General methods you plan to use:

7. List of equipment & supplies:

8. List of background reference consulted: [*At least* two by now — not a textbook or encyclopedia.]
