MATH 1A: Calculus I • Sec 05 • Winter 2020

Room MLC 270 • MTWThF 9:30-10:20AM

COURSE DESCRIPTION

Fundamentals of differential calculus. (5 units)

PREREQUISITE

MATH 43 (with a grade of C or better), or appropriate score on Calculus Placement Test within the past calendar year. Advisory: EWRT 211 and READ 211 (or LART 211), or ESL 272 and 273.

REQUIRED MATERIALS

- WebAssign access code (see HOMEWORK for more information)
- One three-ring binder for notes, exams, quizzes, and other handouts
- Graphing calculator (TI-83/TI-83 Plus/TI-84/TI-84 Plus)
- Pencils, erasers, colored pens, paper, ruler/straight-edge
- Lecture notes printed for each class meeting

TEXTBOOK

- *Calculus Early Transcendentals* by James Stewart, 8th edition ISBN: 978-1337494748

IMPORTANT DATES*

Friday, January 10	Quiz #1
Friday, January 17	Quiz #2
Saturday, January 18	Last day to add quarter-length classes
Sunday, January 19	Last day to drop with no record of grade
Monday, January 20	No class (observance of MLK's birthday)
Friday, January 24	Midterm #1 (Ch 2)
Friday, January 31	Quiz #3 Last day to request pass/no pass grade
Friday, February 7	Quiz #4
Thursday, February 13	Midterm #2 (Ch 2-3)
Friday, February 14	No class (Presidents' Day weekend)
Monday, February 17	No class (Presidents' Day weekend)
Friday, February 21	Quiz #5
Friday, February 28	Quiz #6 Last day to drop with a "W"
Friday, March 6	Midterm #3 (Ch 3-4)
Friday, March 13	Quiz #7
Friday, March 20	Binder Checks
Tuesday, March 24	Final Exam 9:15-11:15AM (Ch 2-4, 10)

**Midterm dates and coverage are subject to change. Final exam date/time is fixed. The instructor will communicate any changes in class and via email.*

COMMUNICATION

I will be using email and Canvas to communicate with you outside of classroom time. Canvas is accessible to all students enrolled in the course (<https://deanza.instructure.com/>) using the MyPortal login credentials. You need check your email on a regular basis as I will send out homework, exam dates, and study reminders. All class handouts, skeleton lecture notes, quiz/midterm solutions, etc. will be uploaded onto Canvas. If you miss class, you will need to print out the lecture notes and ask a classmate to share his/her completed lecture notes with you. If you need to contact me, please email me directly. Do not contact me via WebAssign, as I may not see it.

MAKE-UPS POLICY

You **MUST** take the exams on the dates listed. There are absolutely no make-up quizzes, homework, or exams. The final exam date and time have been determined and mandated by the college. No early/late final exam may be scheduled. If you know that you are unable to take the final at the date and time above, you must drop the class now.

HOMEWORK (WEBASSIGN)

- Homework will be assigned after the introduction of each section in class lectures
- You must have an access code and do the assignments on WebAssign to be successful in this course. Therefore it is mandatory that you be an active user of WebAssign. **Students who are registered in Math 1A but do not activate a license will be dropped.** If you need some time to get financial aid or to save up money, you can use the trial period for the first week.
- To enroll yourself into our WebAssign course, you will need to first log in to Canvas and then use the WebAssign homework links embedded on the Home page of our course.
- You will be able to access the assignments on Canvas after each section has been presented in class and the due date is determined to be 5 days after the chapter has been fully covered in class. For example, if the instructor finishes covering Section 3.2 on a Monday at 10:30AM, then you are expected to have Section 3.2 Homework completed by that Saturday at 11:00PM. **Please do not procrastinate!**

Collaboration on the homework is encouraged, but each student must write his/her own solutions and not copy them from anyone else. If you have questions about problems from WebAssign, you may email me or see me in office hours. **No late assignments accepted!**

QUIZZES

An in-class quiz will be given once per week on Friday, except for the weeks where a midterm/final exam is scheduled. The quiz will include topics that were covered during that particular week and/or the previous week. You are permitted to use any and all of your lecture notes to help you with the quiz. There will be a total of 7 quizzes this quarter.

ATTENDANCE

It is essential that you participate and regularly ask questions in order to succeed in this course and your future math courses. Therefore, attendance is required and students are expected to attend all sessions of each class. Attendance may be taken at any point during the class (beginning, middle, or end). If you use your phone/tablet/laptop or any unrelated material, I may ask you to leave and that day will count as an absence.

Instructors may drop students from class if they fail to attend the first class meeting, or when accumulated unexcused hours of absence exceed ten percent of the total number of hours the class meets during the quarter. **I will drop students who do not attend the first class meeting.** You should NOT rely on your instructor to drop you from your course. If you decide to stop attending class, it is your responsibility to drop. Failure to do so will result in a grade of F.

CLASSROOM ETTIQUETTE

- Keep your cell phones on silent and hidden.
- To promote a safe and positive learning environment, you are to be respectful to me and to your classmates. Please do not talk during lecture. If you have a question, raise your hand.
- Your full attention and participation is expected.
- You are required to come to class prepared WITH lecture notes printed out.

GRADING

- Attendance is mandatory as part of your participation grade. You must also be present to completely fill in your binder for the binder check at the end of the quarter.
- Please see the FAQ at the end of the syllabus for information about the binder check.
- There will be three in-class midterms and a final. Please bring in a valid photo ID on exam days.
- If your final exam score is higher than any of your midterm scores, the final exam score (excluding any extra credit points) will be used to replace the lowest midterm score. If the lowest midterm score is a result of cheating, it will not be considered for the replacement.
- Your two (2) lowest WebAssign homework score will be dropped. However, I still encourage you to do all assignments in order to get the most out of this course. Remember that practice is key!
- Your lowest quiz score will be dropped.
- The grades for the exams will be changed only if there is a clear error on my part, such as adding up marks incorrectly. Problems must be brought to my attention immediately after exams are returned.
- Changing your work (adding to and/or erasing any of your work) after the exam has been graded is considered to be academic dishonesty and you may earn a 0 on the exam.
- An incomplete grade (I) is rarely assigned. It will only be assigned in extreme situations (i.e. unforeseeable emergency and justifiable reason at the end of the term that prevent you from completing the course). You must be in good standing with near-perfect attendance and an overall grade of a 70% (C) or greater in order to request for an incomplete grade.

Breakdown of grades:	
Homework	15%
Binder Check/Participation	5%
Quizzes	15%
Midterm #1	15%
Midterm #2	15%
Midterm #3	15%
Final Exam	20%

Quarter grade:	
≥ 100%	A+
93-99.9%	A
90-92.9%	A-
88-89.9%	B+
83-87.9%	B
80-82.9%	B-
78-79.9%	C+
70-77.9%	C
68-69.9%	D+
63-67.9%	D
60-62.9%	D-
0-59.9%	F

Final grades are non-negotiable. You should monitor your scores in the gradebook regularly throughout the quarter. If there are any discrepancies, they should be brought to my attention as soon as possible.

STUDENT LEARNING OUTCOMES

Students successfully completing this course will be able to:

- Analyze and synthesize the concepts of limits, continuity, and differentiation from a graphical, numerical, analytical and verbal approach, using correct notation and mathematical precision.
- Evaluate the behavior of graphs in the context of limits, continuity and differentiability.
- Recognize, diagnose, and decide on the appropriate method for solving applied real world problems in optimization, related rates and numerical approximation.

TUTORING

Tutoring is available for all students in the Tutorial Center, S-43. Tutoring is provided at no charge by qualified, trained tutors. Tutors can give students feedback on their course work, help them understand assignments and provide students strategies for improving their learning skills.

For more information, visit <http://www.deanza.edu/studentsuccess/mstrc/>

ACADEMIC DISHONESTY

By enrolling in this class you agree to uphold the standards of academic integrity as outlined in the current De Anza college catalogue. Dishonesty includes but is not limited to signing in someone other than yourself on the attendance sheet, in-class cheating, out-of-class cheating, plagiarism, knowingly assisting another student in cheating or plagiarism, or knowingly furnishing false information to college staff, faculty, administrators or other officials. **If you are observed cheating, you may receive an F on the assignment/exam and be dismissed from the course. Furthermore, the incident will be reported to the Dean of Student Development for review and a note will be made in your school records. Please do not give me any reason to suspect cheating.**

CODE OF STUDENT CONDUCT

The college has an obligation to specify those standards of behavior essential to its educational mission and campus life. The students who are in violation of the Code of Student Conduct are subject to disciplinary sanctions which apply at all times on campus as well as to any off-campus functions sponsored or supervised by the college.

ACCESSIBILITY ACCOMODATIONS

If you have a documented disability and wish to discuss academic accommodations, or if you would need assistance in the event of an emergency evacuation, please inform me as soon as possible.

EMERGENCY INFORMATION

Check out the Emergency website for information on what to do in an emergency (earthquake, electrical outage, fire, extreme heat, severe storm, hazardous materials, terrorist attack) here:

<https://www.deanza.edu/emergency/>. Be familiar with these procedures. Information on this page is updated as required.

LAST NOTE

Please remember that you are responsible for your education. This means that if you are having trouble understanding a concept presented in class, I encourage you to ask questions during class or in office hours. Do not wait until the end of the quarter to realize that you need help. Math and Statistics are hierarchical subjects – they continue to build up on knowledge from previous material. If you miss a lecture, ask a friend to share his/her lecture notes with you.

Frequently Asked Questions

Before emailing me, please refer to this sheet.

QUESTION: What is expected of me in each lecture?

ANSWER: You are expected to come prepared with your graphing calculator and pencils/pens to take notes along with your 3-ring binder for this class. You **MUST** print out and bring “skeleton” lecture notes in which you will fill in. If there are problems for you to try on your own, you are expected to do the work.

At the beginning of lecture, if you have questions about the homework from the night before, you may ask those question. Doing so will not only help you, but other people in class.

Make sure to sign in on the attendance sheet for each lecture. Do **NOT** sign in for anyone else.

QUESTION: I am sick and cannot make it to lecture today. What should I do?

ANSWER: You need to email me with your situation so that you are excused. Lecture notes are posted on Canvas. You will need to download the notes, print them out, and ask a fellow classmate to share their filled-in notes with you. I will not scan my written notes onto Canvas. If a quiz was given, I will drop your lowest quiz score.

QUESTION: I am having trouble with a homework problem. How should I ask you for help?

ANSWER: You can come into my office hours to ask for help. If you are unable to visit me at that time, then you can send me a *specific* email about the question. Your email asking me for help must have the three main parts:

1. Tell me the exact question number and what section it is from.
2. Copy and paste the problem into the email.
3. Show me your attempt at the problem. In other words, do not simply email me the phrase, “I don’t get it.”

Example:

Subject: Math 1A Homework Help

Hi Ms. Lien:

I am stuck on problem ___ on WebAssign section ___. The problem is... (copy and paste the homework question here). This is what I tried to do... (show me your attempt - you can type out what you tried or you can take a picture of your work and attach it in the email).

Thanks,
(your first AND last name)

Note: If I am not able to identify who you are based on your email address or name at the end of the email, I will not respond. Furthermore, if you do not follow this format of the three parts required when asking for help on homework, I will not respond.

QUESTION: I was not able to do the WebAssign homework because _____. Will you grant me an extension?

ANSWER: No. In this course, there are no make-up assignments. However, I understand that unforeseen events may come up during the quarter that may prevent you from completing an assignment on time. This is why I will drop your two (2) lowest WebAssign homework assignment at the end of the quarter.

QUESTION: I missed a midterm. Can I make it up?

ANSWER: Unless you had a prior arrangement with me, you may not make up a midterm. If you know that you cannot take a midterm on the assigned date, you must bring this to my attention at the beginning of the quarter for an alternative.

QUESTION: What is the binder check?

ANSWER: On the last lecture of the quarter (Friday, March 20), I will check your binder for lecture notes, quizzes, midterms, corrections, and any other handouts given in class. All lecture notes must be filled in, which is why it is important that you attend all lecture meetings. However, if you must miss class, you can always print out the notes (from Canvas) and ask a classmate to share their completed notes with you. All pages **MUST** be hole-punched and properly placed *in order* in a 3-ring binder.

What should be in your binder by the last lecture:

1. All lecture notes, completed and filled in with **YOUR** handwriting
 2. Midterm #1, Midterm #2, Midterm #3 **and** corrections to any problems where points were deducted
 3. Quizzes **and** corrections to any problems where points were deducted
 4. Any other handouts provided
-

QUESTION: I am not in high school anymore. Why are you making us do a binder check? ☹

ANSWER: Aside from mathematics, I hope to help you with your organizational skills for college. You should be maintaining all of your work as if they were valuable documents. That way, if there is a mistake on my part in inputting grade points, you can easily find and show me the error. Also, being organized with your notes will make studying for the exams an easier process.

QUESTION: How do I earn credit for participation?

ANSWER: To earn the full 5% for participation, you must be present in class and provide me with your full attention. This means you are following along with the lecture and filling in your notes, asking me any questions if something is unclear.

QUESTION: What is my current grade in the class?

ANSWER: I use Canvas to keep track of the scores you earn on each assignment, quiz, and exam. You should monitor it regularly to see your current standing in the course.

Got a question that isn't listed? Please email me at lienamanda@fhda.edu.
