A scientific calculator (**recommended**). Homework access code for WebAssign **is required** and can be purchased from the bookstore or from webassign.net. ### Attendance Policy

Regular class attendance is expected. **Students missing any day the first week will be dropped from the course.** After the first week, a student may be dropped from the class if she/he is absent **three** times. Dropping or withdrawal from the class due to hardship is the students' responsibility. A student who stops coming to class and does not drop/is not dropped by the instructor by May 27 will receive an "**F**" grade. It is the students' responsibility to inform the instructor if she/he is going to be absent and the student is responsible for any material covered/announcements made on the day of the absence. **\*\*An "excused absence" is an absence due to a medical emergency, some other unavoidable situation, or school related function that is supported with documentation/evidence\*\*.**

### Classroom Etiquette/Course Format

The classroom is a learning environment. **No cellular phones or computers should be in use**, unless arrangements have been made prior to the start of class. Once lecture begins, there should be no "social" conversations. I expect that each student will give their best effort to be attentive and participate in the classroom discussions. All students are expected to respect the learning of others and should refrain from disruptive/disorderly conduct or any acts that could negatively impact the classroom learning environment. There should be no derogatory/negative comments about classmates or any communications that could be perceived as ridicule, and students should not be asking their classmates for clarification of topics during lecture. **NO EATING OR DRINKING IN THE CLASSROOM.**

Every student is expected to show up to class prepared to learn. This means that students should arrive ON TIME, have ALL required materials, and be prepared to focus on course content for the duration of the class period. Students are expected to give their best effort in every aspect of this course, including the completion of all problems given as examples in the classroom and those assigned for homework. In addition, students are expected to adhere to the tenets of the Foothill/De Anza Community College District Student Code of Conduct.

Cheating/Academic Dishonesty will not be tolerated; this includes copying the work of another student's review assignment or lab project results. Instances of cheating/academic dishonesty will be dealt with in accordance with De Anza College's policy, and may result in an "**F**" grade for the course.

### Homework Policy

Homework will be assigned for each section of the textbook that is covered in the class. Online homework is to be completed using WebAssign (www.webassign.net, Class Key: **deanza 9918 6860**) Homework assigned online will be due at 11:59 pm on the Sunday of the week it was assigned. Extensions will not extend beyond 7 calendar days following the original due date. Last day to access homework is Tuesday, March 21.
